Associate Roofing Inc.
21 Arnold Street
Braintree, Ma. 02184

Mr. Paul Lynch:

The roof at 34 Free Street in Hingham needed replacing. I contacted eight roofing company's. We examined all the proposals and selected Associate Roofing as our contractor. We chose to go with the architectural 30-year shingles, and the ice shield to be installed along the bottom three feet of the roof. New drip edge around the whole roof was to be replaced, new boots around the vent pipes and new flashing around the chimneys.

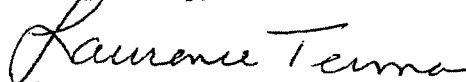

Paul Lynch came to the house with samples and discussed the whole procedure of replacing the roof, along with a new proposal for us to look at. We received a telephone call on Friday, the 7th of March, stating that the workers would be installing the roof on Monday the 10th of March, weather permitting. Monday morning the workers arrived early and went right to work stripping the old roofing material. Both my wife and myself were impressed with the work and their professionalism in completing the work in one day.

The cleanup around the house was impeccable with the final touch of running a big magnet over the grounds to collect the roofing nails that had fallen. The dumpster was placed on wooden planks to assure that the driveway would not be damaged.

I would highly recommend Associate roofing to anyone thinking about having his or her roof replaced or repaired.

We wish to thank all the workers and supervisors for their hard work and a very good job well done.

Respectfully,

Laurence Terman
