RE: Associate Roofing, Inc.

To Whom It May Concern:

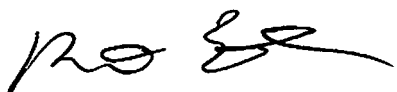

The Association decided in 2010 to install new roofing, several years ahead of the planned replacement schedule, due to ongoing leakage with the original roofs.

We interviewed several companies and decided on using Associate Roofing because of their years in business, excellent referrals and ease of doing business.

During the process there was continuous communication and updates, the crews were friendly and courteous and the job was completed on schedule. It is now approximately 7 years later and we have had no major problems----even with some of the monstrous storms we have had over the years. A few minor issues came up and they responded quickly and efficiently and resolved the issues.

I would recommend them highly for any renovation projects.

Sincerely,

A handwritten signature in black ink, appearing to read 'Richard Bochenek', with a stylized flourish at the end.
